

## COMPLEMENTARY ACTIVITIES IV

**Study Programme: MIMV    Curricular Year: 1<sup>st</sup>    Semester: 2<sup>nd</sup>    Compulsory    Credits: 1 ECTS**

**Lecturer(s): Graça Alexandre-Pires**

### 1. Contact hours:

**Lectures - 2;    Practicals - 28;    Seminars - 6**

**2. Objectives:** Complementary Activities IV aim to endow the students with the following knowledge:

Familiarize the student with laboratory research activities and provision of services developed in the FMV, in terms of awareness of the different strands of professional Veterinary Medical Act.

Ensure that the student follows and participate in laboratory activities and recognize the lab as a workplace where security is fundamental in material handling, equipment and reagents.

Promote on student attitudes and behaviors appropriate to each security practical activity-laboratory.

Promote the knowledge about the different student professional possibilities.

### 3. Programme:

The syllabus is formulated according to the objectives to be achieved and the competencies to be acquired and the progressive development of a reasoning about the laboratory work and how this serves the research in veterinary medicine. Aware of this knowledge the student get prematurely the idea of service to society and through seminars involving the applicability of veterinary science becomes more able to prematurely go equating the Veterinary Sciences where would exercise activity.

### 4. Bibliography:

Handouts from different seminars.

Nunes, F. (2009). *Prevenção dos Riscos Biológicos - Normas de Segurança e boas Práticas Laboratoriais*. FMV.

### 4. Assessment:

The students' knowledge is evaluated at the end of the term with a written examination concerning the seminars subject. As the assistance to laboratories is compulsive 5 values of the final note comes from this assistance.
