

ANATOMICAL PATHOLOGY II

Study Programme: MIMV **Curricular Year:** 3rd **Semester:** 5th **Compulsory** **Credits:** 5 ECTS

Lecturer(s): Maria da Conceição Peleteiro (CCP), Jorge de Jesus Correia (R) and José Ferreira da Silva

1. Contact hours:

Lectures - 26 hours; **Practicals** - 39 hours; **Tutorial** - Cytology practical in the Teaching Hospital – 2 hours; **Total – 67 hours**

2. Objectives:

A) Cognitive capabilities: to define the response to injury of different tissues and organs. Describe the macroscopic lesions observed using the appropriate scientific language, establishing the relation cause-effect and the degree of dysfunction.

B) Technical capabilities: to perform a necropsy of various domestic animals, to provide an accurate and complete report and collect material for complementary exams. To perform a Fine Needle Aspiration Biopsy (FNAB) and a punch biopsy.

3. Programme:

Theoretical - Pathology of the following organs and systems: Skin. Respiratory system: Upper respiratory tract, lung and pleura. Urinary system: kidney and bladder. Male genital system: testes, spermatic cord and adnexal glands. Female genital system: ovary and uterine tubes, uterus, vagina and vulva. Mammary gland. Endocrine glands. Locomotor system: bone, muscle and joints. Eye and ear.

Practical - Necropsy technique in domestic mammals and birds. Collection of material for cytological exam. Skin biopsy with scalpel and punch. Observation of preserved pathological cases, representative of lesions of various organs and systems of the theoretical programme.

Dr. John M. King's Necropsy Show & Tell, Cornell Veterinary Medicine, U.S.A. (online) (<http://w3.vet.cornell.edu/nst/>).

4. Assessment:

Practical: mean value of the necropsy reports (60%) and the practical exam (40%). The theoretical: multiple choice questions and one open-ended question. Final classification: FC = 0,5 T + 0,5 P.
