

HYGIENE AND FOOD SAFETY

Study Programme: MIMV Curricular Year: 3rd Semester: 2nd Compulsory Credits: 4.5 ECTS
Lecturer(s): António Salvador Barreto (CCP), Marília Catarina Ferreira (R)

1. Contact hours:

Lectures - 26 hours **Practicals** - 26 hours **Total** – 52 hours

2. Objectives:

The knowledge of the basic concepts of production hygiene, aiming the fulfil of animal welfare. On the other hand, the students should be able to cooperate in the elaboration of proactive systems for quality assurance.

3. Programme:

Theoretic - Hygiene concept. General elements of animal hygiene. Hygienic design of equipment. Methods and techniques of veterinary hygiene. Pest control. Personal hygiene. Water and waste waters. Methods of treatment. Control of environmental pollution. Biofilms in food industry. Evolution of Veterinary Hygiene – bioassurance and food quality and assurance. Hygiene and work safety. Food Safety. Risk assessment. Reactive and pro-active systems in food quality. Sampling rules. Good Practices Codes. Traceability. Integrated systems of quality assurance. The HACCP system. Plans of autocontrol. Integration of quality management systems. Plan for approbation and control of hygienic quality – PACE. The SAFE system. Label and consumer.

Practical - Microbiological analysis. Personal and environmental hygiene. Water analysis. Cleaning and sanitation of plants and equipment. Hygiene and safety in work. Risk assessment models. Proactive methods for Quality Assurance.
