PATHOLOGY LAB

ANIMAL HEALTH - ONE HEALTH RESEARCH GROUP

HIGHLIGHTS

Double-labeled immunofluorescence of the expression of PD-1 and LAG-3 in TILs of feline mammary carcinoma.

Aquaculture, including in Portugal, has been growing sustainably

X-ray of a dead body with the presence of numerous firearm projectiles which constitutes forensic judicial evidencethat the cause of death was a gunshot

Immunohistochemistry staining of Beta Amyloid proteins in brain of Tg2576 transgenic mice expressing Alzheimer's disease.

Isospora serini merozoites in the liver of a canary fledgling

A dead body of an Iberian Lynx, once extinct in Portugal and now reintroduced, for health examination and identification of the cause of death
